

Pilot Approval Package

****PROPOSED ONLY ? NOT APPROVED ? NOT EXECUTED****

Generated: 2026-07-03T04:15:07.100222+00:00

Proposal

? Operation ID: 'd1440973-a1d9-4c72-9c39-d992a08d5a97'
? Action: 'scale_deployment'
? Status: 'PENDING_CONFIRMATION'
? Execution label: 'LIVE-ELIGIBLE / NOT EXECUTED'
? Idempotency key: 'meridian-[REDACTED]-scale-2-to-3-v1'
? Payload hash: '01d4211b68133b9df33a64c43284509a60fb13ba489e4ba661228949a2c0f508'

Pending approval

? Approval ID: 'bc63be25-1fc0-4d4a-9b76-63c307e993ca'
? Status: 'PENDING'
? Expires: 2026-07-04T04:15:07.082223Z
? Approver: Meridian Pilot Approver <approver@customer.example>

Target

? Deployment: '[REDACTED]' in '[REDACTED]'
? Environment: meridian-staging-np (non-production)
? Integration: '4d106712-0035-42f7-be12-451fc4a8c665'

Change

Meridian non-production pilot: scale deployment [REDACTED] from 2 to 3 replicas in namespace [REDACTED] (environment meridian-staging-np). Approval does not execute any change.

****Rollback:**** Scale replicas from 3 back to 2 in namespace [REDACTED]

****Baseline hash:**** 'None'

Maintenance window

Saturday 02:00?04:00 UTC

Verification plan

- ? Kubernetes desired, ready, and available replicas = 3
- ? Three Ready pods with no rollout failure events in namespace
- ? Pod restart count does not increase unexpectedly versus before-state
- ? Prometheus kube_deployment_status_replicas_available query (supplemental only)

Evidence limitations

- ? [REDACTED] workflow history unavailable ? repository metadata only
- ? Prometheus namespace workload metrics unavailable ? supplemental query evidence only
- ? Kubernetes deployment and pod evidence is the primary verification source

Verification criteria

Safety statements

- ? Approval alone does not execute any infrastructure mutation.
- ? A separate typed confirmation and execution step is required after approval.
- ? This package documents a proposed reversible scale operation only.
